My comments on the Draft EIR/EIS are:

It is shocking that this project continues in the face of all the region's economic and environmental realities. Every effort should be being made to reduce commuting, leap-frog development, habitat destruction and auto emissions. This project will make all these matters worse, all to speed transit through the area. To recoup the cost to the county of all the uncontrolled development in past decades, a moratorium should be imposed on all such projects.
