

The Roadrunner

Friends of the Northern San Jacinto Valley

www.northfriends.org

February 2010

Since 1991, the Friends of the Northern San Jacinto Valley have been working to preserve and protect the northern San Jacinto Valley, the San Jacinto Wildlife Area, and Mystic Lake. We do this by sponsoring nature walks at the wildlife area, writing comment letters, and attending multiple meetings on the many land use and transportation issues that affect this beautiful valley. In March the Riverside County Board of Supervisors (with one no vote) approved an 11,350 unit housing project on the southern boundary of the San Jacinto Wildlife Area. The project, if built, will have devastating impacts on the SJWA, its plants and animals. The project will also destroy valuable prime agricultural lands. Please take time to read our newsletter and consider the many urban pressures that have the ability to change the wildlife values of the SJWA for generations to come. Join us as we speak out and ask, if not demand, that our elected officials make better land use and planning decisions.

SAN JACINTO WILDLIFE AREA News:

SAN JACINTO LAKE CHRISTMAS BIRD COUNT, December 22, 2009 by Tom Benson, Compiler, San Bernardino Valley Audubon Society: Seventeen intrepid volunteers braved some early morning rain to participate in the San Jacinto Lake Christmas Bird Count on December 22, 2009. The rain quickly cleared giving way to a cold and breezy but mostly nice day. Highlights from the day's count included: Snow/Ross's Goose (flying over the Sanderson sewage ponds), Bald Eagle (Lake Perris and San Jacinto Wildlife Area), Ferruginous Hawk (SJWA), 2 Golden Eagles (Sanderson sewage ponds), all four expected falcons. Glaucous-winged Gull (first winter, Ramona Expressway and Lake Perris), 2 gray Flycatchers (SWJA), Vermilion Flycatcher (Sanderson sewage ponds), Yellow Warbler (SJWA), Brewer's Sparrow (Lakeview Mountains?), and a possible Purple Finch (SJWA). We did not find Mountain Plover, Long-eared Owls (second consecutive year we've missed it), or Short-eared Owl. Thanks to everyone who came out and counted birds!

STATE FURLOUGH DAYS at the SJWA: Please be aware that the San Jacinto Wildlife Headquarter **Offices** are closed the first, second and third Friday of the month due to the state budget crisis. **All of the closings are subject to change.** The usual office hours are 6:30 a.m. to 3:00 p.m. If you need to contact the wildlife area manager and staff to ask questions, please allow ample time for them to respond. If you have to leave a message, they will contact you as soon as they can. The gates to the wildlife area are usually open from 7:00 a.m. to sunset every day, furlough days, weekends, state and federal holidays included. Please remember that the SJWA staff is doing their best to accommodate visitors to the wildlife area and answer all of your questions.

FRIENDS NEWS & PROJECTS:

LAWSUIT FILED OVER VILLAGES OF LAKEVIEW SPECIFIC PLAN AND GENERAL PLAN AMENDMENT APPROVAL by Sue Nash:

The Riverside County Board of Supervisors approved the 11,350 unit Villages of Lakeview (VOL) Specific Plan 342 at their March 23, 2010 board meeting. At the February 23 board meeting, where the board gave its tentative approval, Supervisor Bob Buster made extensive comments about the project wondering how such a large project could possibly benefit the county when there are 30,000 homes already approved by the county and cities within the county and they are not yet built. He also sharply criticized placing so many homes next to the San Jacinto Wildlife Area. Supervisor Marion Ashley was strong supporter of the project and read a long statement touting its benefits. (Supervisor Ashley is running unopposed for reelection in June.)

On April 22, the San Francisco environmental law firm of Shute, Mihaly & Weinberger filed a complaint challenging the project on behalf of the Friends and the Sierra Club. On the same day, the Center for Biological Diversity filed a complaint representing themselves and the San Bernardino Valley Audubon Society. The city of Riverside also filed a lawsuit opposing the Village of Lakeview. This project, which is projected to be the core of the 'new city' of Lakeview with a population of over 100,000 people, will destroy the San Jacinto Wildlife Area (SJWA). The placement of high density dwelling units on the southern boundary of the SJWA will have devastating impacts to the wildlife area and destroy prime agricultural lands.

The 19,000 acre San Jacinto Wildlife Area is a state Department of Fish and Game facility; its lands are partial mitigation for the State Water Project; it is a Stephens' Kangaroo Rat reserve for the Riverside County Habitat Conservation Agency (RCHCA); it is a cornerstone reserve in the Riverside County Multi-Species Habitat Conservation Plan (MSHCP), the reserve system which, in theory, is supposed to protect and preserve the county's endangered animals and plants. Light pollution, air pollution, damage to wildlife area lands which would harm rare and endangered plant and animal species, building next to the flood plain of the San Jacinto River, collapsible soils, loss of prime agricultural lands, availability of water, feral animals, and illegal entry by residents, and the economic viability of the project are some of the other concerns regarding this project. And the project will have devastating impacts on the rural communities of Lakeview and Nuevo.

The Friends are working on a separate fundraising letter which will have more details. We and the attorneys feel confident that this project can be stopped, but we need your help.

Southern Boundary, SJWA. VOL project site is on the right.

FRIENDS OF THE NORTHERN SAN JACINTO VALLEY V. DEPARTMENT OF FISH AND GAME by Sue Nash:

On April 19, the Riverside County Superior Court (Judge Fisher) continued the hearing on the Friends objections to the return on the writ of mandamus that we won in the Court of Appeal until Friday April 30 at 1:30 p.m. Hopefully, the court will read the Friends' objections and order the Wildlife Conservation Board and the Department of Fish and Game (DFG) to cease all activity on the Project Site which may harm the environment until an Environmental Impact Report, a Negative Declaration or a Mitigated Negative Declaration is prepared for the San Jacinto Wildlife Area Wetlands Restoration Project. Our goal is to redesign the configuration and the wetlands flooding management of the duck ponds created by this project so that all of the species (rare plants, burrowing owls, tri-colored blackbirds, and numerous shorebirds) can prosper. We are hoping that DFG will soon join us in complying with the California Environmental Quality Act and improving the management of the SJWA.

FRIENDS MAKE COMMENTS ON THE MOTTE LAKEVIEW RANCH SPECIFIC PLAN 366, GENERAL PLAN AMENDMENT, CHANGE OF ZONE by Sue Nash:

This 628 acre mixed-use development is proposed adjacent to the southern boundary of the San Jacinto Wildlife Area, north of the Ramona Expressway and northeast of the Villages of Lakeview project site. It consists of 2,000 dwelling units (6,000 residents) and 45 acres of commercial employing 400 people. There are 375 acres of recreational, conservation, and buffer for the SJWA. Some of the project lands are within the hundred year flood plain. There are numerous faults, ground cracks and ruptures as well as a large potential for ground ruptures and shaking at the project site. The northeast portion of the project site is within areas of potential encroachment by Mystic Lake. The project site is also within the flood inundation map for the potential seismic failure of Lake Perris Dam. A public scoping session for the project was held at the Riverside County Administrative Center during the day which made it difficult for public and community residents to make comments and/or discuss the project with planners and the project proponent. The Draft Environmental Impact Report on this project may be issued as soon as this summer. Now that the Villages of Lakeview has been approved, it is critical that this project also be defeated. Both projects must be stopped cold to preserve the integrity of the SJWA, the prime agricultural land (where are we going to provide additional habitat for the species on the SJWA and have affordable local food to eat?), protect our air quality and reduce the County's carbon footprint to help

reduce the catastrophic impacts of global warming on the earth. The Friends, Sierra Club, Center for Biological Diversity, California Native Plant Society and several Native American tribes submitted written comments on the Notice of Preparation the project. The Riverside County planner for the is Matt Straite at 951-955-8631 or mstraite@rctlma.org

RIVERSIDE COUNTY GENERAL PLAN UPDATE CONTINUES by George Hague:

Riverside County approved their General Plan (GP) in 2003 and was required to begin a General Plan Update (GPU) five years later. They have been working on the update since 2008, but there has been little public input during the last six months. The county formed the General Plan Advisory Committee (GPAC) a few years ago. While the majority of the GPAC members are related to either water or development interests, the environmental community has one vote. George Hague, a Friends board member, represents the environmental community on the GPAC and Ann Turner-McKibben, also a Friends board member, is the alternate. The committee was meeting on a regular basis until last October. There has been no input from the GPAC committee since that time, and there are no meetings scheduled for April or May. It appears the County is having difficulty funding the experts which they must hire to do important studies for the general plan update. They are writing grants in hopes of acquiring the necessary funds to move forward and get the GPU back on track. The Friends are very concerned that the county is not doing a Climate Action Plan (CAP) as part of the general plan update process. They plan on doing some interim measures related to Air Quality/Green House Gases and will hopefully adopt a CAP within a couple of years. We are concerned that they did not require the 11,350 unit Villages of Lakeview Specific Plan 342 to be part of the General Plan Update, but instead decided to approve the VOL project before the general plan update was completed. The Draft Environmental Impact Report (DEIR) for the general plan update may come out in late summer or early fall, and it is very important to have organizations like the Friends making comments at that time. There are many ways the General Plan Update's environmental impact report (EIR) could have an impact on the San Jacinto Wildlife Area and all of Riverside County. Public hearings before the county Planning Commission will probably take place late this year or early 2011. Once approved by the county Planning Commission, the GPU will then go before the Riverside County Board of Supervisors for approval.

SAN JACINTO RIVER LEVEE PROJECT by Ann

McKibben: The city of San Jacinto and the Riverside County Flood Control District have proposed to extend the San Jacinto River levee from State Street to Sanderson Avenue, a \$25 to \$30 million project. The draft environmental impact report may be released in April. The project would fill 1,900 acres of flood plain along the San Jacinto River so it could be developed by the city of San Jacinto. There are concerns that the project will eliminate San Bernardino kangaroo rat, burrowing owl and least Bell's vireo habitat. Developers are pushing for the approval of the project so that their projects (Villages of Lakeview and Motte Lakeview Ranch) would be protected from flooding. There are also concerns about the downstream effects on the San Jacinto Wildlife Area and south to Canyon Lake and Lake Elsinore. For more information on the project, call the city of San Jacinto at (951) 487-7330.

BRIDGE STREET COMPOSTING FACILITIES by Sue

Nash: Two unpermitted composting facilities are operating on the southeast side of Bridge Street, near the corner of Bridge Street and Gilman Springs Road. Condition Use Permit 3600 is in the 100 year flood plain of the San Jacinto River and consists of green waste and yard waste. A discussion of any impacts to the San Jacinto Wildlife Area will be covered in the California Environmental Quality Act (CEQA) document. Conditional Use Permit 3627 is outside the 100 year flood plain and consists of green waste, horse bedding and cow manure. Again, any impacts to the SJWA will be covered in the CEQA document. The Friends are closely monitoring both of the Conditional Use Permits and CEQA progress of these composting facilities and will continue to write comment letters to the Riverside Planning Department and the California Regional Water Quality Control Board, Santa Ana Region to ensure that the San Jacinto Wildlife Area is protected.

PERRIS DAM REMEDIATION PROJECT by Ann

McKibben: The state Department of Water Resources released the draft environmental impact report for the Perris Dam Remediation Project on January 11. Comments on the draft document were due April 12, 2010. The water level behind the dam has been lowered by 25 feet because of concerns that the dam may fail in a major earthquake (the San Jacinto Fault is east of the dam). The dam has been seeping water for many years and the seepage supports riparian habitat at the base of the dam, lands that belong to the San Jacinto Wildlife Area. These lands are State Water Project mitigation lands and are included within the San Jacinto Wildlife Area. If the preferred project plan is selected, the SJWA riparian lands would be destroyed by a large berm and additional wildlife mitigation lands will be lost due to the construction of an emergency release outlet channel. To see the draft EIR and for more information see: <http://www.water.ca.gov/lakeperris/>

MORENO VALLEY PLANNING & LAND USE ISSUES:

HIGHLAND FAIRVIEW CORPORATE PARK, MORENO

VALLEY by Ann McKibben: The Sierra Club settled its lawsuit against the city of Moreno Valley over the Highland Fairview Corporate Center (along the southern border of Highway 60 between Redlands Boulevard and Theodore Street) in January 2010. The lawsuit was filed after the city approved the plan in February 2009. The project will house the Skechers USA Inc. distribution center. A groundbreaking ceremony was held for the 1.8 million square foot Skechers USA Inc. facility on March 12, 2010. The public was not invited. The local newspaper received a press release for the event the morning it took place. Governor Arnold Schwarzenegger attended, made comments and took part in the showcase shoveling event. Many local elected officials attended and touted the economic benefits of the project. The developer also made comments and stated that he intends to develop 36 million square feet of warehousing and logistical centers for his corporate park in eastern Moreno Valley on lands north of the San Jacinto Wildlife Area, between the SJWA and Highway 60. According to a Press-Enterprise article, there is 18.9 million square feet of industrial space in the cities of Perris and Moreno Valley. About 17 percent is vacant. Fifteen projects are described in a brochure found at the city of Moreno Valley web site: http://www.moreno-valley.ca.us/do_biz/pdfs/office-indust-opp0908.pdf

There is empty retail space, mall space, and numerous 99 cent stores in Moreno Valley, and the city continues to approve warehousing in Moreno Valley. Air quality, inadequate freeways are a few of the issues that

have not been addressed. Construction on the project may start this spring.

WESTRIDGE COMMERCE CENTER by Ann McKibben:

The city of Moreno Valley released the Notice of Preparation (NOP) of a Draft Environmental Impact Report for the Westridge Commerce Center (Ridge Property Trust project) on October 1, 2009. A public scoping meeting was held on October 28, 2009. The proposed project would put a 943,000 square foot industrial warehouse on 54.66 acres south of Highway 60 near the Redlands Boulevard exit and west of the Highland Fairview Corporate Park. There is no information on when the draft environmental impact report will be issued. For more information contact Planner Jeff Bradshaw at (951) 413-3224.

PROLOGIS PARK by Ann

McKibben: There is no new information on the ProLogis Project, a 2 million square feet warehouse project proposed between Moreno Beach Drive and the Quincy Channel on the south edge of Highway 60 in Moreno Valley. Planner for the project is Jeff Bradshaw at (951) 413-3224.

QUAIL RANCH SPECIFIC PLAN by Ann McKibben:

There is no new information on the Quail Ranch Specific Plan. The proposed project would locate 1,500 dwelling units along the east side of Gilman Springs Road, across from Mystic Lake and the northern portion of the San Jacinto Wildlife Area. The project site includes the former Quail Ranch Golf Course (which is now closed) and is within the sphere of influence of the city of Moreno Valley. If the plan is approved, the city will have to go through the process of incorporating the project site into the city. Planner for the project is Jeff Bradshaw, (951) 413-3224.

PROPOSED STATE LEGISLATION:

GET THE LEAD OUT! by Tom Paulek:

At the urging of California Audubon, State Assembly member Pedro Nava introduced AB 2223 which seeks to ban the use of lead shot on state wildlife areas. Although lead shot is completely banned on federal national wildlife refuges, state of California wildlife areas (627,000 acres of land which include the San Jacinto Wildlife Area), still allow the use of lead shot in the shotgun hunting of upland game (pheasant, snipe, dove, quail). Both wetland and upland birds have been shown to ingest lead shot. AB 2223 notes that lead poisoning has been observed in 37 species of non-waterfowl birds with adverse impacts on mourning doves being especially acute. To give you a feel for the magnitude of this problem, a typical 12 gauge shotgun shell, which is used for upland game hunting, contains 1.12 ounces of lead shot composed of 350 lead pellets. For every 1,000 shotgun shells expended on the SJWA during the upland game hunting season, approximately 70 pounds of lead (comprising 350,000 lead pellets) are randomly scattered on the SJWA lands. Please contact your state representative and let them know you support AB 2223. It is just a matter of common sense. You can find your state assembly representatives at: <http://www.assembly.ca.gov/>

THANK YOU FOR YOUR DONATIONS! The Friends sincerely appreciate all of the generous donations we received during our October fund appeal. We also appreciate your longtime support of the Friends' work as all of us work together to protect and preserve the San Jacinto Wildlife Area.

THANK YOU TO ALL OF THIS SEASON'S NATURE WALK LEADERS: Gordon Pratt, Greg Ballmer, Tom Paulek, Sue Nash, Patrick Temple, Dave Bramlet, Samantha Dempster, Dan Lacek. And Thank You to San Bernardino Valley Audubon leaders: Michelle Tobin, Jennifer Tobin, Cathy Tobin, Dave Goodward, Tony Metcalf, Doug Karalun.

NATURE WALKS AND FIELDS TRIPS AT THE SAN JACINTO WILDLIFE AREA:

Three of our scheduled walks were cancelled this winter due to heavy rains and muddy roads—the January 24 Bluebird Box Walk, SBVAS's Beginning Bird walk on February 7, and the Archeology Walk on February 27. We were able to reschedule the Plant walk on April 10 and the Bluebird Box walk on April 24. Here are a couple of reports on our rescheduled walks.

Report—April 10, 2010, Saturday, 9:00 a.m. to Noon SJWA PLANT WALK

Patrick Temple and Dave Bramlet led the plant walk at the wildlife area on April 10. We saw a wide range of plants, both native and non-native: buttercups, California aster, smooth tar plants, vernal malt, wild buckwheat, and encelia. Birds seen: western kingbird, black phoebe, California towhee, killdeer, Say's phoebe plus many others. This was a wonderful educational experience as we learned that plants are dependent on soil conditions, water, and have a number of coping mechanisms to adapt to years when there is a drought.

Report—April 24, 2010, Sunday, 9:00 a.m. to Noon BLUEBIRD BOX NATURE WALK

Samantha Dempster, Dan Lacek and Sue Nash were the leaders for the Bluebird Box Nature Walk. There are approximately 45 bluebird boxes installed at the San Jacinto Wildlife Area. With the rapid loss of nesting habitat throughout the inland counties, the boxes provide important nesting opportunities for birds. One person quietly checked the boxes while the rest of the group viewed them from afar

so we would not disturb any nesting birds. Nesting birds found: Bewick's wren and tree swallows. Interesting facts learned on the walk: though some boxes remain empty, there need to be many boxes available. Just like humans, birds like to have a choice of where to live. Bewick's wrens can nest as late as July so boxes need to remain undisturbed for a long period of time.

BEGINNING BIRD WALKS:

The San Bernardino Valley Audubon Society organizes and sponsors Beginning Bird Walks (BBW) at locations in Riverside and San Bernardino counties. We are fortunate that a number of the walks are held at the San Jacinto Wildlife Area. Please note that the BBWs start at 8:00 a.m. Please check their web site at: www.sbvas.org to verify all information on dates, time and locations for all of their Beginning Bird Walks. Or call Cathy Tobin at (951) 684-9613. **Thank you SBVAS!**

FOR INFORMATION on the Friends walks, call Ann McKibben at (951) 924-8150 or Sue Nash at (909) 228-6710. Our walks are free and open to all. Children are welcome and you do not need to be a member of the Friends to join us on any of our walks.

WHERE TO MEET: All nature walks meet at the appointed time in the parking lot of the San Jacinto Wildlife Area headquarters at 17050 Davis Road, Lakeview. There are picnic tables and restrooms available if you want to spend the day.

FOR ALL WALKS: Bring binoculars, camera (if you are interested), non-toxic insect repellent, sturdy walking shoes, hat, sunscreen, plenty of water, lunch, snacks, and wear appropriate clothing for the weather.

WAIVER FORM: All walk participants need to sign waiver of liability form. Please be aware that minors (under the age 18) cannot sign the waiver. The signator must be a parent or other responsible adult. If you will not be with or are dropping off a minor at one of the Friends' nature walks, please call Sue Nash at (909) 228-6710 or e-mail her at: snash22@earthlink.net

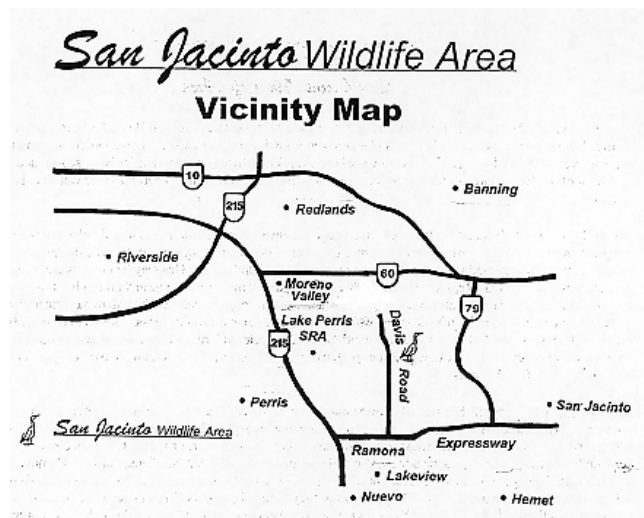

TO VISIT THE SAN JACINTO WILDLIFE AREA:

Hours: The wildlife area is open seven days a week from Dawn to Dusk. You are welcome to visit on your own at any time. There is an Information Kiosk on the east side of Davis Road adjacent to the parking lot.

DIRECTIONS TO THE SAN JACINTO WILDLIFE AREA: San Jacinto Wildlife Area, 17050 Davis Road, Lakeview. Telephone: (951) 928-0580. **DAVIS ROAD IS CLOSED**

FROM MORENO VALLEY. Please use one of these alternate routes to visit the San Jacinto Wildlife Area. From Moreno Valley: go south on Perris Boulevard to the Ramona Expressway; go east on the Ramona Expressway to Davis Road in Lakeview; go north on Davis Road 2.3 miles to the headquarters. From Hemet/San Jacinto Area: take the Ramona Expressway west to Davis Road in Lakeview; go north on Davis Road 2.3 miles to the headquarters. From Highway 215: take the Ramona Expressway east to Davis Road in Lakeview (traffic signal); go north on Davis Road 2.3 miles to the area headquarters.

PLEASE USE CAUTION WHILE DRIVING ON DAVIS ROAD IF THERE HAVE BEEN RECENT RAINS. Do not drive on Davis Road if it is muddy or it is raining. During the rainy season, please call the wildlife area headquarters, (951) 928-0580, during regular office hours (6:30 a.m. to 3:00 p.m.) to ask about road conditions.

OTHER NEWS:

SJWA TOUR FOR STUDENTS: Last November board members Tom Paulek and Greg Ballmer gave a tour of the San Jacinto Wildlife Area to about 20 students from a Riverside Community College introductory ecology class. Instructor Preston Galusky wanted to introduce his students "to the wildlife area as a means of looking at how conservation efforts rely on ecology." Thank you to Professor Galusky for bringing his class to the SJWA and to Tom and Greg for volunteering their time to give the tour.

"TAKE ACTION" ON THE FRIENDS' WEB PAGE: The Friends have updated information on our nature walks and "Take Action" notices on our web site at: www.northfriends.org Because our newsletter only comes out twice a year, it is difficult to notify our members about public hearings, comment deadlines, and cancellation of walks. Take a look and keep up with our current news.

E-MAIL ADDRESSES: Please consider including your e-mail address on your membership/donation form so that we can send you updated information about the San Jacinto Wildlife Area. We do not share or sell names, mailing addresses, or e-mail addresses with other organizations or individuals.

SELF-GUIDED AUTO TOUR: a self-guided auto tour is available for visitors to use at the San Jacinto Wildlife Area.

These reusable guides follow a series of signs and explain what can be seen at each of the seven stops. You can pick them up from a box which is adjacent to the entrance kiosk. You will find a "return" box for the guides sitting on the other side of the road as you leave the wildlife area.

TIRED OF OUR NEWSLETTER? The Friends would be happy to remove your name from our mailing list if you no longer want to receive our newsletter. Send your name and address to: Friends of the Northern San Jacinto Valley, P.O. Box 9097, Moreno Valley, CA 92552-9097; e-mail: northfriends@northfriends.org or call Ann McKibben at (951) 924-8150 to have your name deleted. Our current newsletter is posted on the Friends' web page at: www.northfriends.org

THANK YOU to Margie Breitkreuz and Ann McKibben for folding, labeling, and sealing our fall newsletter.

UP-COMING EVENTS:

MARCH 27 & 28, 2010 (Noon to 5 p.m.) & 18 (9 a.m. to 3 p.m.), 2010 - SPRING PLANT SALE, UCR Botanic Gardens. Information: (951) 784-6962. www.gardens.ucr.edu
MAY 1, 2010 (10 a.m. to 3 p.m.) - DUCK DAZE, Hidden Valley Nature Center, 11401 Arlington Avenue, Riverside. Information: (951) 785-7452.

VOLUNTEERS: What can you do to help the Friends? Volunteers attend public meetings, help with the newsletter, monitor bluebird boxes, lead nature walks. Let us know if there is something you would like to do to help the Friends. Call (951) 924-8150 or e-mail us at northfriends@northfriends.org
