CITY OF MORENO VALLEY
Planning Division

March 24, 2013

Dear Sir,

I would like to take this opportunity to comment on the "World Logistics Center" planned for eastern Moreno Valley. I own a home in Mission Viejo neighborhood of Riverside that is located very near Alessandro Boulevard. I hope to retire there in nine years.

To lessen the negative impact of the development I would like to see railroad service extended through out the development. This would include freight and passenger transit station. Rail is the most energy efficient method of moving freight and reduces the number of needed trucks and cars.

To mitigate the negative impact on wildlife the developer needs to create a wildlife corridor connecting Lucerne Canyon Wilderness Park and Box Springs Park. This would help lessen the impact of the increased traffic on wildlife created by the development.

The developer of the "World Logistics Center" needs to be held responsible for the impact of his actions on the entire Inland Empire region.

Sincerely,
T. Sam Ziady
